

Particle Physics: Introduction

José I. Crespo-Anadón

Week 1: January 27, 2018
Columbia University Science Honors Program

Welcome!

José I. Crespo-Anadón

Postdoc on MicroBooNE and SBND experiments at Fermilab (IL, USA)

Inês Ochoa

Postdoc on ATLAS experiment at CERN (Switzerland)

Cris Vilela

Postdoc on T2K and Super-Kamiokande experiments in Japan

Schedule

Month	Day	Lecture	Teacher
January	27	Introduction	Jose
February	3	History of Particle Physics	Jose
	10	Special Relativity	Jose
	17	Quantum Mechanics	Jose
	24	Experimental Methods	Cris
March	3	The Standard Model - Overview	Cris
	10	The Standard Model - Limitations	Cris
	17	No classes, Columbia University spring break	
	24	Neutrino Theory	Cris
	31	No classes, Easter and Passover weekend	
April	7	Neutrino Experiment	Jose
	14	LHC and Experiments	Ines
	21	No classes, SHP break	
	28	The Higgs Boson and Beyond	Ines
May	5	Particle Cosmology	Cris

Course policies

- Classes from 10:00 AM to 12:30 PM (10 min break at ~ 11:10 AM).
- **Attendance record counts.**
 - Up to four absences
 - Lateness or leaving early counts as half-absence
 - Send email notifications of all absences to shpattendance@columbia.edu
 -
- Please, no cell phones during class
- **Please, ask questions!**
- Lecture materials + Research Opportunities + Resources to become a particle physicist

<https://twiki.nevis.columbia.edu/twiki/bin/view/Main/ScienceHonorsProgram>

Resources on Research Opportunities

Useful links

- <http://sps.columbia.edu/highschool>
- <http://www.stonybrook.edu/undergraduate-admissions/future-students/programs-for-high-school-students/>
- <https://www.rockefeller.edu/outreach/summer-science/links/>
- <https://research.princeton.edu/students/research-opportunities/>
- Fermilab Summer Internship: <http://ed.fnal.gov/interns/programs/quarknet/index.shtml> (requires you to live in Fermilab's area, maybe you can apply if you have family/friends there)
- CERN S'Cool LAB Summer CAMP: <http://scool.web.cern.ch/content/scool-lab-summer-camp>
- Brookhaven National Laboratory High School Research Program: <https://www.bnl.gov/education/program.asp?q=219>

And when you are in college, you can be part of our Research Experience for Undergraduates (REU) program. More information at <https://www.nevis.columbia.edu/reu/>

Resources on Tools to become a Particle Physicist

- Learn how to use the shell, either from Linux or Apple's Mac OS. A quick introduction is <https://community.linuxmint.com/tutorial/view/100>
- C++ is the main language used in particle physics. A popular reference is <http://www.cplusplus.com/doc/tutorial/>
- ROOT is a software framework written in C++ which is used by particle physicists for their analyses. A compilation of resources can be found at <https://root.cern.ch/getting-started>
 - Here is a great tutorial followed by the REU students at Nevis: <https://www.nevis.columbia.edu/~seligman/root-class/>
- Python is also a common language and it's a particularly good one for programming beginners. A compilation of resources is [here](#) but you can find plenty others online.

Evolution of the number of elementary particles

The Final Periodic Table?

	mass →	charge →	spin →																		
QUARKS	$\approx 2.3 \text{ MeV}/c^2$	$\frac{2}{3}$	$\frac{1}{2}$	u up	$\approx 1.275 \text{ GeV}/c^2$	$\frac{2}{3}$	$\frac{1}{2}$	c charm	$\approx 173.07 \text{ GeV}/c^2$	$\frac{2}{3}$	$\frac{1}{2}$	t top	0	0	1	g gluon	$\approx 126 \text{ GeV}/c^2$	0	0	0	H Higgs boson
	$\approx 4.8 \text{ MeV}/c^2$	$-\frac{1}{3}$	$\frac{1}{2}$	d down	$\approx 95 \text{ MeV}/c^2$	$-\frac{1}{3}$	$\frac{1}{2}$	s strange	$\approx 4.18 \text{ GeV}/c^2$	$-\frac{1}{3}$	$\frac{1}{2}$	b bottom	0	0	1	γ photon					
	$0.511 \text{ MeV}/c^2$	-1	$\frac{1}{2}$	e electron	$105.7 \text{ MeV}/c^2$	-1	$\frac{1}{2}$	μ muon	$1.777 \text{ GeV}/c^2$	-1	$\frac{1}{2}$	τ tau	0	0	1	Z Z boson					
	$< 2.2 \text{ eV}/c^2$	0	$\frac{1}{2}$	ν_e electron neutrino	$< 0.17 \text{ MeV}/c^2$	0	$\frac{1}{2}$	ν_μ muon neutrino	$< 15.5 \text{ MeV}/c^2$	0	$\frac{1}{2}$	ν_τ tau neutrino	± 1	0	1	W W boson					
	LEPTONS																				
																					GAUGE BOSONS

Quiz

- Draw lines between the fermions and the bosons that can interact with them

Charged leptons

Neutrinos

Quarks

Photon

Weak bosons

Gluon

Higgs Boson

Standard Model solution
